

[REDACTED]

[REDACTED]

Dear [REDACTED]

Re: Official Information Act Request:

Thank you for your email on Monday 05 August 2024 in which you requested information under the Official Information Act 1982. You requested:

*“The total amount co-funded in each of the last three years across the public sector for EV charger installation projects. For example, see the attached from the Ministry of Education which notes that EECA co-funded 50% of the cost of the projects. Please break this down by recipient organisation.”*

You will find the information you requested from EECA attached to this letter. Please note the associated caveats that relate to the information presented within the table.

You have the right to seek an investigation and review by the Ombudsman of this decision. Information about how to make a complaint is available at [www.ombudsman.parliament.nz](http://www.ombudsman.parliament.nz) or freephone 0800 802 602.

Please note that it is our policy to proactively release our responses to official information requests where possible. Our response to your request will be published shortly at <https://www.eeca.govt.nz/about/news-and-corporate/official-information/> with your personal information removed.

Yours sincerely

Dr Marcos Pelenur  
EECA Chief Executive

The following caveats relate to the information presented in the below table:

- The dollar values presented below reflects the maximum committed co-funding amount that can be claimed and paid to the public agency on completion of the installation and the year denotes the year in which the co-funding contracts were signed and committed to (please note this is distinct from the actual date installation project costs are incurred).
- The proportion of committed EECA co-funding varies per contract, but the maximum amount funded per charger is 50% of the project costs or \$5000, whichever is the larger amount.
- The dollar values provided are the contractual maximum co-funding amount that each agency would be able to claim from EECA for EV charger installation under those contracts. EECA then reconciles project co-funding claims against the project's related invoices before payment is provided to that public agency.

Table 1: EECA's committed public agency co-funding for EV charging related projects within the past three financial years.

Public Agency	2021/2022	2022/2023	2023/2024
AgResearch Limited	\$5,697	\$15,697	\$0
Callaghan Innovation	\$0	\$30,000	\$0
